

On the Surgical Removal of Cardassian Cranial Implants*

A case study of a Cardassian patient

ABSTRACT Space: the final frontier. These are the voyages of the starship *Enterprise*. Its continuing mission: to explore strange new worlds. To seek out new life and new civilizations. To boldly go where no one has gone before!

KEYWORDS surgery; espionage; brains

War is good for business.

We're acquainted with the wormhole phenomenon, but this... Is a remarkable piece of bio-electronic engineering by which I see much of the EM spectrum ranging from heat and infrared through radio waves, et cetera, and forgive me if I've said and listened to this a thousand times [[@Lovelace:1842](#)]. This planet's interior heat provides an abundance of geothermal energy. We need to neutralize the homing signal.

Main section

It indicates a synchronic distortion in the areas emanating triolic waves. The cerebellum, the cerebral cortex, the brain stem, the entire nervous system has been depleted of electrochemical energy [Turing:1936].

```
n_lights <- 2 + 2
n_lights
```

```
[1] 4
```

Any device like that would produce high levels of triolic waves. These walls have undergone some kind of selective molecular polarization. I haven't determined if our phaser energy can generate a stable field. We could alter the photons with phase discriminators.

$$y = \text{Something} + \beta_1 x_1$$

Subsection

Communication is not possible [Keynes:1937]. The shuttle has no power (see Figure 1).

Using the gravitational pull of a star to slingshot back in time? We are going to Starbase Montgomery for Engineering consultations prompted by minor read-out anomalies. Probes have recorded unusual levels of geological activity in all five planetary systems.

Assemble a team. Look at records of the Drema quadrant. Would these scans detect artificial transmissions as well as natural signals?

Figure 1: There are four lights
